Event: Technical quiz – a multiple-choice quiz that covers the basic topics of CSE: AI & ML.

Name of College: A. P. Shah Institute of Technology, Kasarvadavli, Ghodbunder Road, Thane (Maharashtra)

Association: AIML Student Association

Date: 15/09/2023

Time: 3:45 PM to 4:15 PM

Target Audience: S.E. and T.E. students from CSE: AI & ML department

Faculty Accompanied: -
   1. Prof. Vijesh Nair - Making the quiz required question framing skills and with Prof. Vijesh Nair's guidance, we were able to construct tricky yet concise questions to present to the students in a fun and challenging way.

Introduction: -
The technical quiz followed the "Demystifying the Mini Project" event, to pump up their spirits after a rather theoretical seminar on the Mini Project. It was aimed to be a fun event where students can pair up with their friends and battle others in a showdown of knowledge based on the CSE: AI & ML Sem III syllabus.

Event Details: -
The quiz was hosted on the popular quiz platform Kahoot, which included multiple choice questions on the CSE: AI & ML Sem III courses such as Discrete Structure and Graph Theory, Digital Logic and Computer Architecture, Computer Graphics, Data Structures, and Skill Based Lab: Object Oriented Programming in Java, while focusing more on DS and Java. The event was headed by T.E. CSE: AI & ML student Mihir Manjrekar. Challenges were faced during the event, like a limited capacity of 20 participants on the online platform, but quick thinking from members of the AIML Student Association – to pair up students to reduce player count – saved the day. These experiences have taught the student members about the much-required management skills and, in hindsight, to always expect the

unexpected.

Event Winners: -

1. First Prize: Sameer Singh of S.E. CSE: AI & ML

2. Second Prize: Kartik Parmar of S.E. CSE: AI & ML

Conclusion: -

The event was a huge success because by the end of the final round, everyone was cheering for their friends. The final round of the event consisted of a no-options, open ended questions for the top 3 winning champions in the preliminary quiz round with the opportunity-to-answer given to the first person to confidently raise their hand – analogous to a buzzer – while keeping scores for each member. The event winners were awarded with exciting prizes to acknowledge their efforts.
