**Event:** Demystifying the Mini Project - Part 2: A Deep Dive into VS Code for Python

**Name of College:** A. P. Shah Institute of Technology, Kasarvadavli, G.B Road, Thane (Maharashtra)

**Association:** AIML Student Association

**Date:** 12/01/2024

**Time:** 2:50 PM

**Target Audience:** S.E. and T.E. students from CSE: AI & ML department

**Faculty Accompanied: -**
1. Prof. Vijesh Nair - Prof. Vijesh, with his expertise in web technology was able to guide the association in making a demonstrative project that is well understood by beginners.

**Introduction: -**
Embarking on a journey into the heart of Python development, the AIML Student Association recently hosted a captivating seminar, unraveling the symbiosis between Python programming and Visual Studio Code (VS Code). Under the seasoned guidance of the Technical Head, this event unfolded a realm of possibilities, transforming the way students perceive and engage with the world of coding.

**Event Details: -**
The seminar commenced with a seamless installation of the Visual Studio Code editor and Python 3, setting the stage for an organized coding environment. Participants were guided through a concise yet comprehensive tour of the VS Code interface, emphasizing its robust features. The session culminated in the unveiling of indispensable tools and extensions, helping students have a

good, firm and an interesting approach towards learning.

## Event Winners: -
This event was not a competition and so there were no winners.

## Conclusion: -
As participants left the seminar, the AIML Student Association successfully ignited a passion for Python development, leaving an indelible mark on the landscape of possibilities within the CSE-AIML department. With a toolkit enriched by VS Code and guided by newfound knowledge, students are now poised to explore, innovate, and thrive in the ever-evolving realm of Python coding.
